TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Java
Frontend	React.js, Next.js, Redux Toolkit, Context API, Tailwind CSS, Responsive Design
UI Libraries	Shadcn UI, Framer Motion
Backend	Node.js, Express.js, REST APIs, JWT Authentication, WebSockets
Database	MongoDB, PostgreSQL

EXPERIENCE

React Developer Intern

Nov 2025 – April 2026

ForangeX — React, Next.js, TypeScript, REST APIs

- Developed and maintained responsive user interfaces using React.js, Next.js, and TypeScript across **5+ client projects**, ensuring consistent performance on desktop and mobile devices.
- Built and integrated **30+ reusable UI components** and connected them with REST APIs, reducing duplicate code and improving development efficiency across multiple modules.
- Implemented and delivered **40+ frontend features**, including dashboards, forms, authentication flows, and data visualization, while resolving production bugs and participating in peer code reviews.
- Collaborated with designers and backend engineers to translate Figma designs into pixel-perfect interfaces, improving application usability and delivering production-ready features on schedule.

PROJECTS

ChatCV – AI Powered Conversational Resume Builder

[GitHub](#) | [Live](#)

Next.js 15, React.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Docker, Gemini, WebSockets, DODO Payment

- Designed and developed a ChatGPT-style resume builder where users generate complete ATS-friendly resumes through natural AI conversations, eliminating traditional form-based resume creation.
- Built a real-time resume preview engine using React, TypeScript, and WebSockets, enabling users to instantly visualize AI-generated updates without refreshing the page.
- Implemented an end-to-end PDF generation pipeline using LaTeX, allowing users to export ATS-friendly resumes while supporting raw `.tex` downloads for Overleaf customization.
- Developed secure authentication, AI conversation history, auto-save, Dockerized deployment, and integrated DoDo payment subscriptions for premium features. Achieved **1000+ weekly website visits**, onboarded **3 paying users**, and generated **579 MRR** as an early-stage SaaS product.

Baniya's App – AI Powered Smart Store Ledger

[GitHub](#) | [Live](#)

Next.js, React.js, TypeScript, Android, Kotlin, MVVM, NestJS, MongoDB, Gemini, Razorpay

- Built a multi-tenant inventory management platform for kirana stores with complete tenant isolation, enabling every shop owner to securely manage products, pricing, inventory, and business data independently.
- Integrated an AI-powered Hinglish voice assistant using Google Gemini to understand natural language product queries and instantly retrieve retail, wholesale, and cost prices for a seamless in-store experience.
- Developed a scalable backend using NestJS and MongoDB with secure REST APIs, JWT authentication, role-based access control, optimized database operations, and reusable service architecture.
- Integrated Razorpay subscriptions with secure payment verification, automated premium plan activation, billing management, responsive dashboards, advanced product search, and reusable React components for a production-ready SaaS experience.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Sandip University, Nashik

2023 – 2026 June

CGPA: 8.01 / 10

ACHIEVEMENTS & RECOGNITION

- **Finalist** — **IIIT Gwalior Hackathon** among 600+ teams, shortlisted for technical depth and solution scalability.
- **Top 10** — **SunHack** among 400+ teams, awarded for rapid prototyping and UI/UX quality.
- Delivered end-to-end backend systems for multiple early-stage startups, shipping production APIs and database architectures independently.
