EDUCATION

Sandip University Nashik, Maharashtra
BTech (CSE)

Aug 2026

Sandip Foundation Nashik, Maharashtra
Diploma in Information Technology

May 2023

SUMMARY

Hi, I'm Ravi Pandey — a 3rd-year B.Tech CSE student from Sandip University, Nashik, passionate about building innovative tech solutions. I specialize in full-stack development and machine learning, with hands-on experience in React, Python, and AI/ML. As a React developer at Forange Inc. and a freelance software developer, I've helped startups with custom web and software solutions. My learning is backed by internships at Sumago (2022) and Flytonic (2024). I'm driven by a love for tech, a problem-solving mindset, and a vision to create impactful digital experiences.

TECHNICAL SKILLS

Front-End Development: React, Tailwind CSS, Shad CN, Bootstrap, HTML5, CSS3

Back-End Development: Node, Express, PHP, Postman API,

Databases: MongoDB, MySQL, Firebase,

Cloud Services: AWS, EC2

Data Science: pandas, NumPy, Matplotlib, scikit-learn, NLP, TensorFlow

PROJECTS

VroomGo AI – AI-Powered Car Marketplace

April 2025

- **VroomGo AI** is a smart car marketplace where users can chat with an AI assistant to explore cars, ask questions, and get recommendations. Admins can upload a car image, and AI auto-fills all details using image recognition. Built with **Next.js**, **Tailwind CSS**, **Supabase**, and **Clerk Auth**, it's fast, secure, and fully dynamic.

NLP Sentiment Online Products

Feb 2025

- **NLP Sentiment Online Products** is a smart platform that scrapes product reviews using **BeautifulSoup (bs4)** and analyzes them with **NLP-based sentiment analysis**. It displays results on a sleek **React + Tailwind CSS** frontend, helping users make informed buying decisions. Each product includes an **affiliate link** for easy purchase.

Book Recommendation System – AI summary intelligence

Jan 25

- **Book Recommendation System** not only suggests books based on user preferences using AI and collaborative filtering but also provides AI-generated summaries of each book for a quick preview. Built using Python, sci-kit-learn, and NLP, with a clean frontend powered by React and Tailwind CSS.

EXPERIENCE

FORANGE INC – React Dev, Marketing

Jul – Jan 2025

- I interned at Forange Inc for 6 months, gaining hands-on experience with React, Tailwind CSS, and React state management libraries.

FLYTONIC – Web Developer & SEO ENG

Aug – Oct 2023

- I worked full-time at Flytonic as a web developer and SEO specialist, where I learned SEO techniques, PHP frameworks, building production-ready applications, and web deployment strategies.
